

# itslearning Release 86

## Schedule bulletins

Teachers can now schedule when a bulletin should be visible for students and when it should be removed:

### Schedule bulletin

Decide when to show and remove the bulletin.

From

 07/06/2017  05 AM : 55

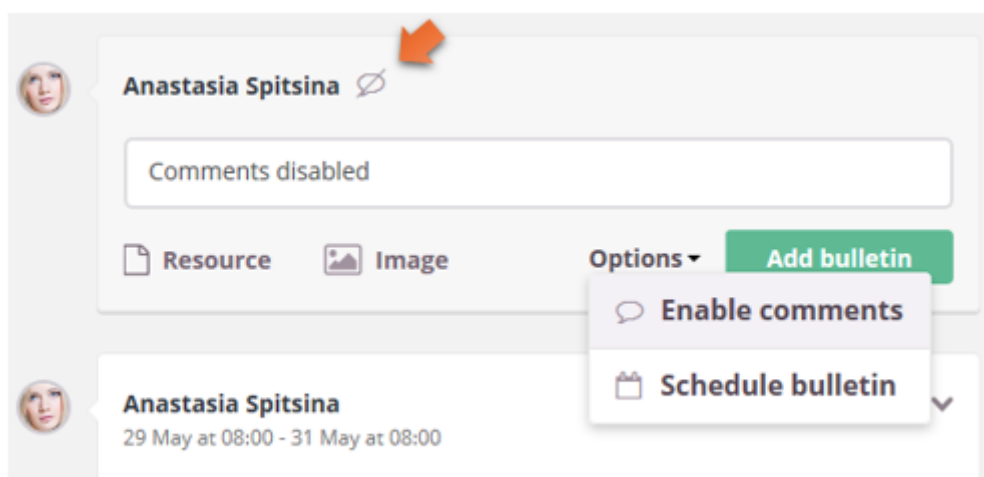

To

 dd/mm/yyyy  08 AM : 00

*Leave empty to keep it visible forever.*

**Apply** **Cancel**

We've also introduced a new icon that shows when comments are disabled. The option to disable or enable comments is moved to the Options menu:

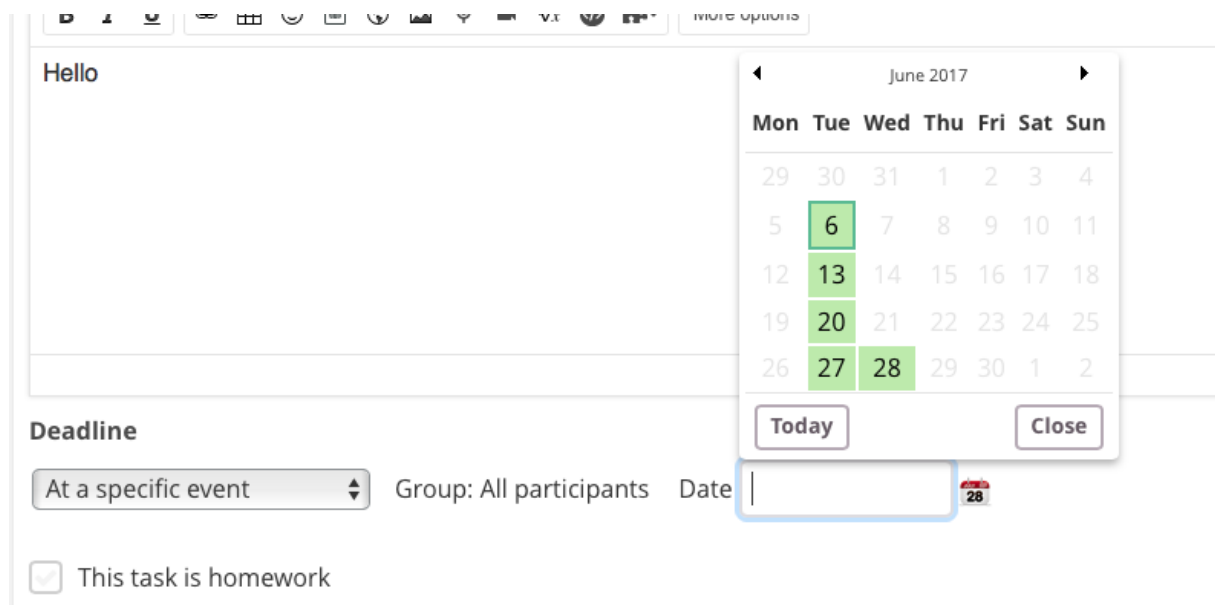

## Activities and homework in calendar events

Until now, tasks and assignments have only appeared in calendar events if they were part of a plan.

Now, you can connect homework, tasks and assignments which are not part of a plan to calendar events .

To connect the activity to an event:

1. Create a calendar event in a course.
2. Add an activity.
3. When setting the deadline, select "At a specific event".
4. Select an event from the date picker (events are highlighted in green).
5. When you click **Save** the activity will appear in the calendar event.

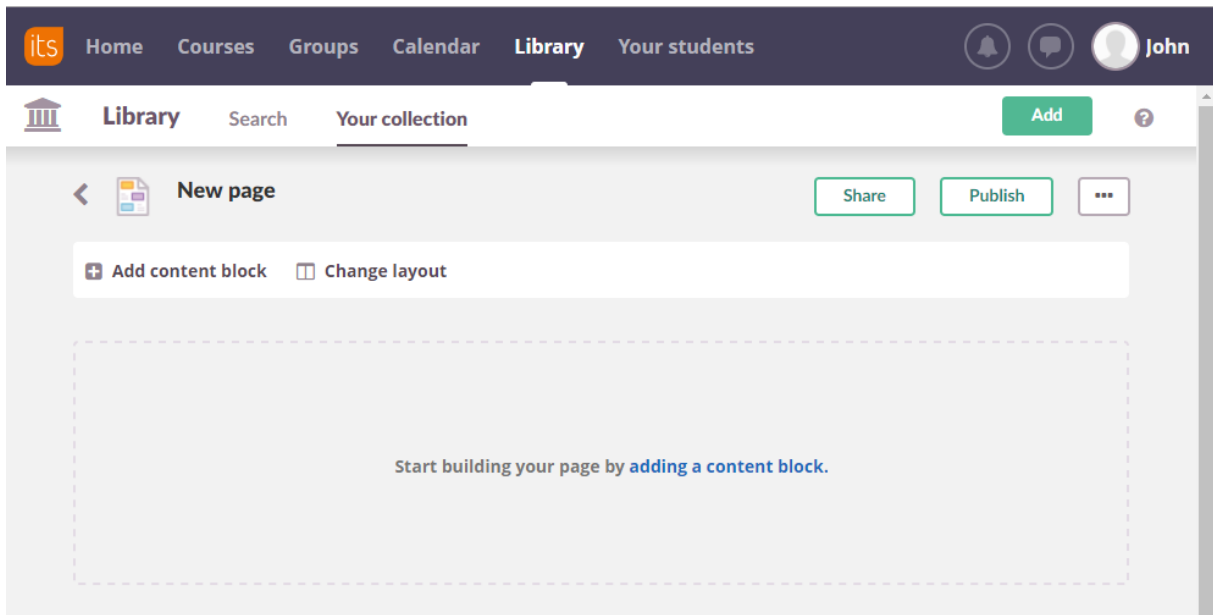

The screenshot shows a form for creating an activity. At the top, there is a toolbar with various icons and a "more options" button. Below the toolbar is a text area containing the word "Hello". A date picker is open, showing the month of June 2017. The date picker has a grid of days from 29 to 2. The days 6, 13, 20, 27, and 28 are highlighted in green. Below the date picker are two buttons: "Today" and "Close". Below the date picker is a "Deadline" section with a dropdown menu set to "At a specific event", a "Group: All participants" label, and a "Date" input field with a calendar icon. Below the "Date" input field is a checkbox labeled "This task is homework".

Homework is labelled with an 'H' in the calendar event.

## [More space in the library](#)

To create more space for the content, we've updated the create and edit content page in the library:

We've also made it possible to review content directly from the preview dialog:

## Advanced reporting

Manual assessments from the gradebook are now available in the data warehouse. Final assessments can be separated from other assessments.

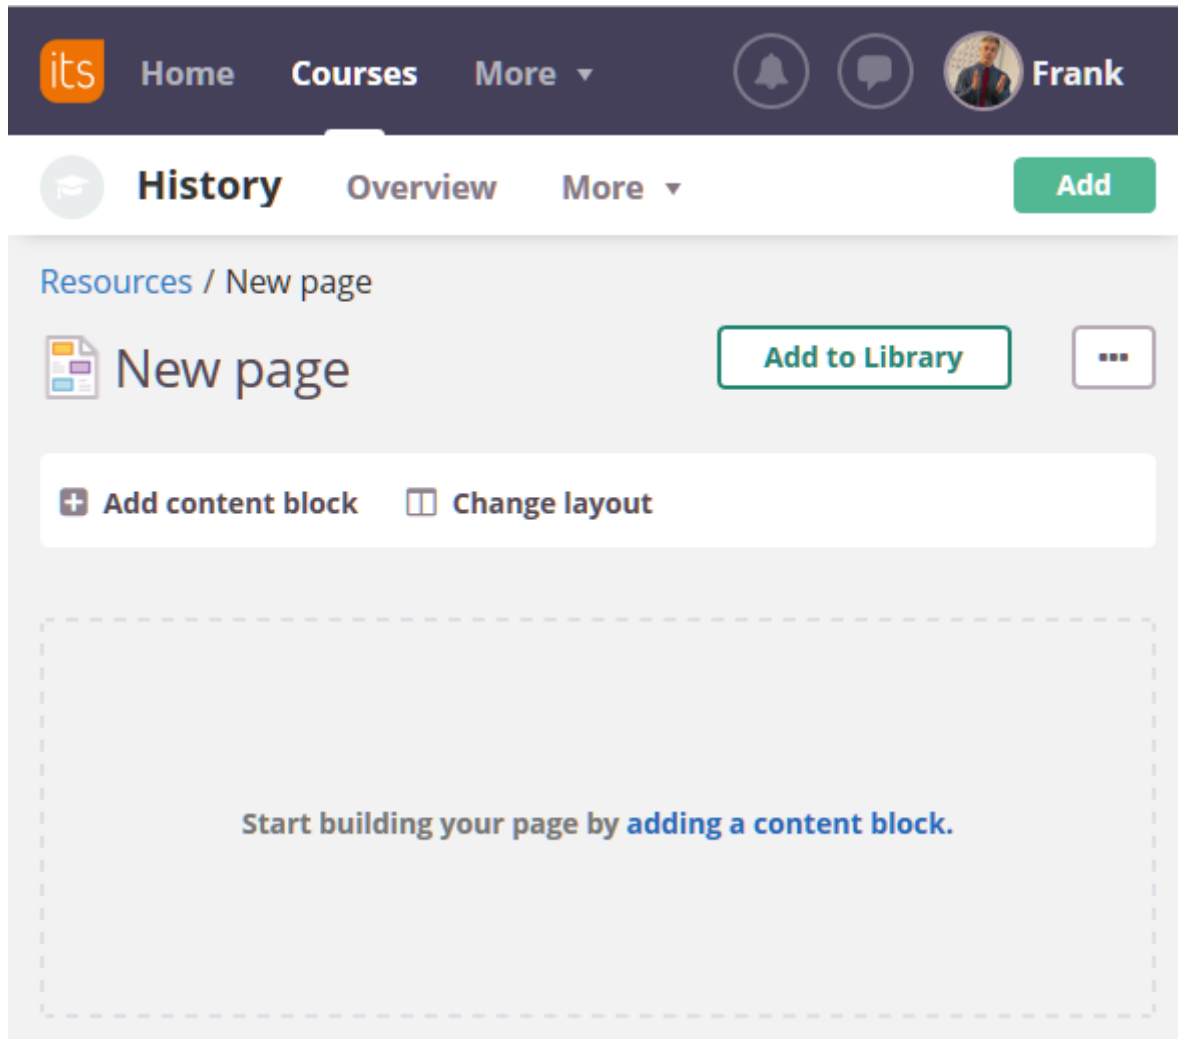

Terms are now available as filter for advanced reporting.

## Trends and progress report

- It's now possible to filter progress based on groups
- We're removing the site setting which is used to control report availability
- The student's profile picture is now shown in the report
- It's now possible to search for a student in the report

## Page tool design

We've done some small adjustments to the design of the page tool:

The screenshot displays the ITS user interface. At the top, a dark navigation bar contains the ITS logo, 'Home', 'Courses', and 'More' with a dropdown arrow. On the right side of this bar are icons for notifications, a chat bubble, and a user profile for 'Frank'. Below the navigation bar, a secondary bar shows 'History', 'Overview', and 'More' with a dropdown arrow, alongside a green 'Add' button. The main content area is titled 'Resources / New page' and features a document icon labeled 'New page'. To the right of the title are an 'Add to Library' button and a three-dot menu icon. Below the title bar, a white box contains two options: '+ Add content block' and 'Change layout'. A large dashed rectangular box occupies the lower half of the page, containing the text: 'Start building your page by adding a content block.'
